ProCare Keyless Entry System

Control building access and security with the Keyless Entry System from [ProCare](#). Designed for front door or interior door security during normal business hours* the Keyless Entry System allows only authorized persons with unique personal identification numbers to open the door and gain entrance to the building.

Monitor building access from your computer

With a simple computer connection the ProCare Keyless Entry System keeps a live record of who enters your building and when. Learn more about [keyless entry features and pricing](#).

Eliminate magnetic swipe cards

Eliminate the time and expense of magnetic swipe cards. With the Keyless Entry System all you'll need for building access is a unique identification code. Each personal identification code can be activated, changed, or placed on a restricted list in just seconds from your computer

*Intended for use during normal business hours. A dead bolt or similar device will be needed when the building is closed.

Take control of building security today!

[Call us](#) to learn how the ProCare Keyless Entry System can solve your building access needs.
